

## HOIST® LEMOND® SERIES

### REVMAS<sup>T</sup>ER PRO

The RevMaster Pro exercise bike, designed in partner with three-time Tour de France champion Greg LeMond, offers a set of sophisticated upgrades built to maximize comfort and withstand the rigors of the club environment. For HOIST®, one of our paramount goals is developing bikes that provide the appropriate fit for a broad range of riders.

Unlike any other group cycling bike, the RevMaster Pro allows four-way adjustability of the height and fore-aft, with micro-adjustments possible on the seat and handlebars. This feature combined with a narrow crank width, ensures a customized fit that closely replicates a road bike— for even the most discriminating riders. The next-generation x-frame features greater corrosion resistance and a guaranteed long life. Plus, a two-piece bottom bracket cartridge and individual flywheel assembly pieces promise ease of service.

### FEATURES

- **Kevlar Belt:** A Kevlar belt instead of a chain. The result is a smooth and QUIET ride. Our belt never needs to be replaced or oiled like most chain bikes.
- **Secure seat lock:** Bottom seat post lock keeps users from sliding seat post completely off the bike for added safety and security.
- **Quality frame:** The RevMaster frame is made using a 17 step manufacturing process for quality and durability.
- **Frame:** Patented next generation X-Frame is more stable and allows for fast, easy access to all seat, handlebar & height adjustments. This creates a comfortable, high performance custom fit for all users! The steel main frame undergoes a rust inhibitor process.
- **Cam Handles:** Comfortable and easy to use, offer quicker adjustments without the hassle of pop-pins and threaded handles.
- **More Adjustment Ranges:** Allow a better fit with more comfort.
- **Improved Corrosion Resistance:** New aluminum components.
- **Fender With Integrated Brake Assembly:** Provides improved braking and doubles as a moisture guard.
- **Brake and Resistance:** Designed for ease of use, the resistance knob easily adjusts. Just turn the knob to adjust (increase or decrease) the intensity of your workout. By simply pressing down on the same knob, the braking system activates quickly and safely. Micro turn adjustment allows for smooth, safe transitions to higher intensity levels.
- **Custom Cranks:** Strong BMX custom cranks & bottom bracket designed to withstand greater force loads than conventional bikes.
- **Easy to switch seat options:** Post will accommodate personal preferences.
- **Pedals:** Equipped with dual-sided pedals featuring both SPD clips and toe clip cages.

### SPECIFICATIONS

#### US / METRIC

Length: 42 in / 107 cm

Width: 23 in / 58 cm

Height: 46 in / 117 cm

Machine Weight: 143 lb (65 kg)

Flywheel Weight: 44.42 lb (20.15 kg)

User Height Range: 58 in (147.3 cm) to 78 in (198 cm) tall

Maximum User Weight: 300 lb (136.1 kg)

## HOIST® LEMOND® SERIES *REVMASTER PRO*

The RevMaster Pilot II is an optional accessory that, when paired with the RevMaster Pro, is the most effective way to measure cycling performance, displaying cadence, time and distance pedaled. The Pilot can also display heart rate and estimated calories burned when used with a heart rate chest strap transmitter (not included). The Pilot is sold separately and is only available for use with the RevMaster Pro.

### SEAT WITH MICRO-ADJUST FIT

Increased adjustable range for exact fit, accommodating customized user preferences.

### IMPROVED CORROSION RESISTANCE

Finished and tested to high standards under extreme conditions.

### KEVLAR BELT

Automotive-grade belt results in a smooth, quiet ride. Delivers long life and maintenance-free operation.

### CUSTOM CRANKS

Forged crank and two-piece bottom bracket are designed to handle the demands of high-use applications.
