World from
Home**

Explore the world from home

Do you want to check out your holiday destination or do you wish to cycle or run through the famous Central Park in New York City? This is possible with Tunturi Routes. Make use of the videos users have uploaded all around the world. The resistance of your cardio equipment will sync automatically with the elevation changes in the video. It's like you are there...

Choose from 50,000+ videos

Never get bored on your cardio trainer again. The platform offers you 50,000+ videos you can choose to play. The videos are from places all over the world, from the United States to Australia and everything in between.

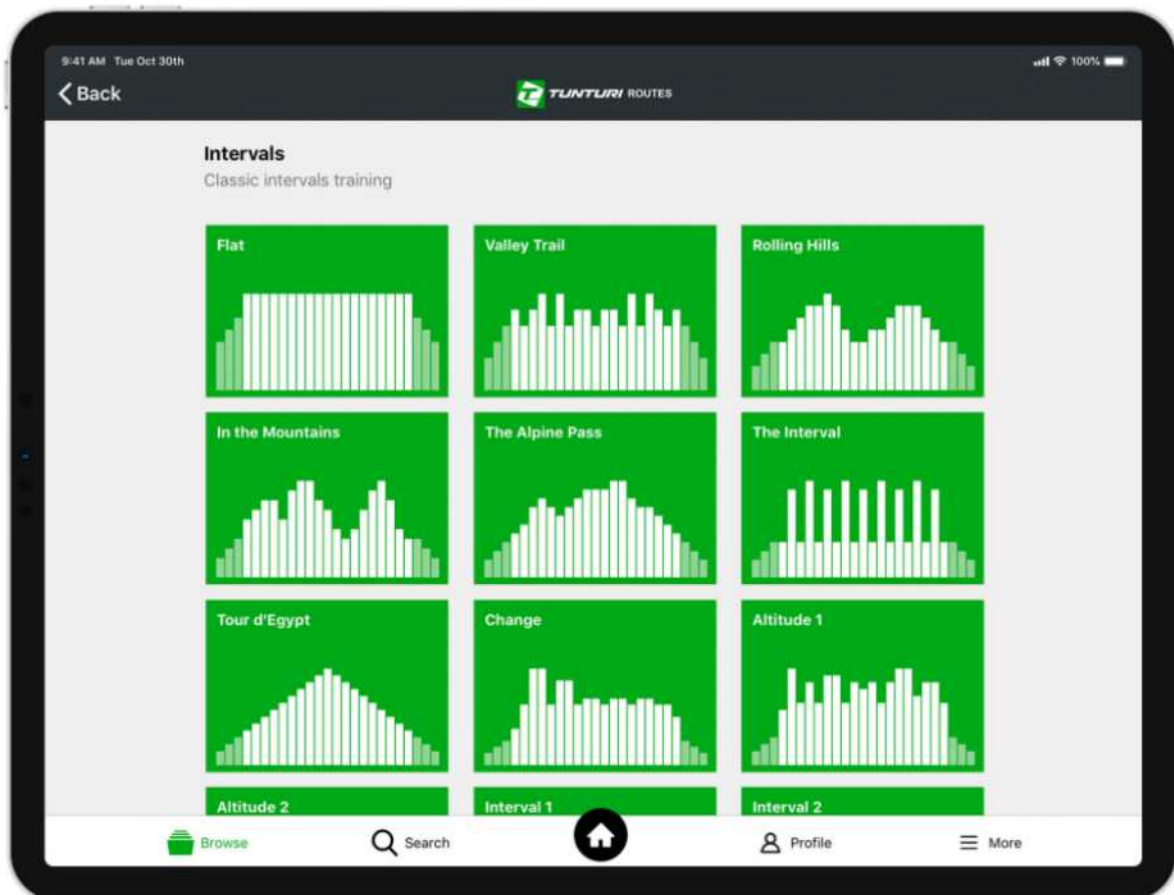

Cycle, cross and run at your own level

Is cycling up the Alpe 'D Huez on your bucket list, but still far out of reach? You can easily adjust the difficulty of video, which makes it possible for you to conquer mountains at your own level. Is the road ahead not challenging enough, increase the level of difficulty and challenge yourself.

Follow coaching classes from home

Do you know spin classes? A room full of sweaty people on spinning bikes accompanied by loud music? Coaches around the world have uploaded their coaching lessons on the platform, so you can follow the instructions of the coach from the comfort of your own home.

Expand your training profiles

Doesn't your cardio trainer have enough training programs? No worries! Tunturi Routes offers a lot more training programs to do interval training. Start an interval training profile you like and decide yourself how long it takes.
